EDUCATION

Angeles University Foundation | Angeles City, Pampanga **2023 - Present**

Bachelor of Science in Computer Science, Major in Data Science | GWA: 95.42

- **Coursework:** Software Engineering, Object-Oriented Programming, Information Management, Human-Computer Interaction, Mobile Development, Agentic AI, and Technopreneurship.
- University Scholar

EXPERIENCE

Inari Amertron Inc. - MIS Intern | Clark Freeport, Angeles, Pampanga **June 2026 - July 2026**

- Collaborated with the MIS team to redevelop EDAS, an internal web application for managing document change requests, review and approval workflows, controlled documents, and implementation tracking.
- Contributed to the development and modernization of the system using PHP, HTML, CSS, JavaScript, and MySQL within an MVC-style application structure.

PROJECTS

Inbetween | Personal Project | Github **September 2026 - October 2026**

- Developed a native macOS menu-bar application that tracks user activity while AI coding assistants and agents are running, providing activity history and productivity insights.
- Implemented local semantic activity classification using Apple's Natural Language framework and sentence embeddings to distinguish productive and distracting activities.
- Integrated Python lifecycle hooks with Swift through Unix domain sockets and implemented persistent session tracking, local activity history, and automated testing.

InstaHAM | Thesis Project | Github **January 2026 - October 2026**

- Developed a computer-vision system for contactless pig assessment using RGB images, covering view suitability, skin-condition classification, and live-weight estimation, with inference integrated into a Flutter mobile application.
- Trained and evaluated machine-learning models using custom and public datasets, validating annotations and implementing source-grouped data splits to reduce data leakage.

Pop Hop | HackForAll Hackathon | Github | Website **April 2026**

- Co-developed a full-stack event management platform connecting flea market organizers and vendors with a team of four; achieved third place overall in HackForAll.
- Developed REST API endpoints and implemented JWT authentication and role-based access control using Next.js and TypeScript, with PostgreSQL and Prisma ORM.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, Dart, PHP, SQL

Frameworks & Libraries: Flutter, Next.js, React, Node.js, Flask, PyTorch

Databases, ORM & Tools: PostgreSQL, MySQL, Prisma, Git, Azure, Power BI, Figma

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals | Cisco Introduction to Data Science | Cisco Introduction to Cybersecurity
